<b>Reference Documents</b>	Data Sheet Version 2.2 or newer version → RA8803_8822_DS_v22_Chi.pdf AP Note Version 2.3 or newer version → RA8803_8822_AP_v23_Chi.pdf (Welcome to visit our member center of web-site to download: <a href="http://www.raio.com.tw">www.raio.com.tw</a> )		
<b>Suitable Chip</b>	The Date Code of production is after "0415".		
<b>Description:</b>	The display quality is not good when used on 240x128 or 160x128 pixels module.		
<b>Suggestion</b>	<ol style="list-style-type: none"><li>1. This default value of register [81h] is "00h". But it cause display quality bad that if your panel resolution is 240x128 or 160x128 pixels. So our suggestion is setup the register [81h] to "40h" when system initial.</li><li>2. The above suggestion is also available for another resolution.</li></ol>
